

TRANSPORTATION, TREATMENT AND FINAL DISPOSAL OF WASTE

We completely solve the needs of our clients thanks to the wide range of machinery and services we offer.

We deliver safe environmental solutions that provide value to the country's sustainable development.

We rely on services for the transportation, treatment and final disposal of hazardous and non-hazardous waste according to our clients needs, and offer the widest national coverage range and variety of equipment for transport as

Tankers, hoppers, ampliroll, hooklifts tanks, suction and flat ramps, among others, which allow us to cover two large areas of industrial waste: Hazardous and non-hazardous Liquid Industrial Waste (RILs) and Solids (RISes).

Services

TRANSPORTATION, TREATMENT AND FINAL DISPOSAL OF WASTE

DESCRIPTION

The goal of the treatment is to physically and chemically modify the substances contained in the waste. We rely as well, on secure storage destined for final waste disposal. Both services comply with the specific requirements of the DS148 regulations for hazardous waste.

- This integral service is personalized and adapted to each client according to their needs, complying with national and international certifications for laboratories.

CHARACTERISTICS

- Logistics, for the withdrawal of waste in a safe manner, complying with the current legislation.

BENEFITS

- National coverage and an integral service for the transport, treatment and final waste disposal in secure installations.
- Inertization line of treatment to eliminate hazardousness or reduce the mobility of the toxic components found in the waste.

- Physical chemical line of treatment, for the RILs treatment with the purpose of eliminating or reducing its hazardousness.

- Secure storage with double-layer water-proofing, drainage and a leak detection system for final waste disposal.
- IDS 148 regulatory compliance
- Final waste disposal certification.
