

# Safety, occupational health, environment and quality policy

Hidronor Chile S.A. is a leading company in the management, revaluation, treatment and final disposal of industrial waste, providing comprehensive environmental solutions in all sectors of the national economy, thus contributing to the development, growth and sustainability of the country.

The development of processes and delivery of services are based on ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 standards and the principles of ASIQUIM's Responsible Care® standard.

Hidronor Chile S.A. bases its commitment on the following principles:

- 1. Permanent occupational health and safety** through risk identification, evaluation, control, minimisation and/or elimination of hazards, analysing the causes of each incident in order to maintain a culture of occupational health and safety.
- 2. Protection of the environment** through the identification, prevention, control of impacts and responsible use of resources.
- 3. Customer satisfaction**, complying with the requirements established in each case in a timely and quality manner.
- 4. Promotion of sustainable development** from an integral perspective, based on collaborative work, encouraging communication and participation of its collaborators, clients, communities and all interested parties.
- 5. Compliance with legal requirements** applicable to the management and handling of hazardous and non-hazardous waste, safety, occupational health and environmental protection.
- 6. Continuous improvement** in processes, establishing objectives to increase performance through visible management leadership, resource allocation and trained human capital.
