

WE ADD VALUE

By providing industrial and hazardous waste treatment, revaluation, soil remediation, recycling and on-site services.

COMMITTED
TO SUSTAINABILITY

We contribute to environmental sustainability and to climate change mitigation

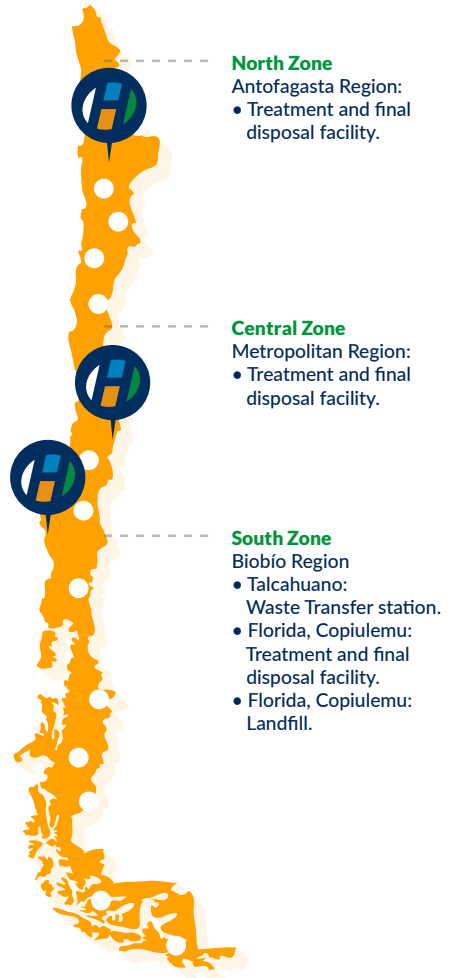

With our innovative solutions for industrial and hazardous waste treatment, revalorization, soil remediation, recycling, on-site services and final disposal.

We deliver solutions nationwide through our treatment plants in the central, northern and southern areas of the country, in addition to our landfill and biogas plant located in the Biobío region, on which we rely on.

Our services include consulting, analysis and characterization of waste through laboratories internationally certified by the Center of Experts in environmental analysis of Quebec, Canada, plus highly qualified personnel to find the best solution for industrial and hazardous waste management, contributing therefore, to the sustainable development of the country in alignment with the regulations of the EPR Law to support companies with their proper waste management.

Additionally, our subsidiary company Greendot, is dedicated to recycling waste in order to prepare it for its recovery and outsourcing.

NATIONAL COVERAGE

We have managed and recovered over 500,000 tons of contaminated soil.

We recover more than 12,000 tonnes of hazardous waste annually.

COMPREHENSIVE ENVIRONMENTAL SOLUTIONS THAT CONTRIBUTE TO THE CIRCULAR ECONOMY OF THE COUNTRY

..... **Transport, treatment and final waste disposal**

- Hazardous and non-hazardous, industrial liquid wastes (HILW)
- Physical and chemical treatment line
- Hazardous and non-hazardous Industrial Solid Wastes (ISW)
- Inertization process line
- Secure containment

..... **Waste revalorization and recycling**

- Waste revalorization to be converted into Solid and Liquid Alternative Fuel (CAS and CAL) production.
- Aluminum Aerosols revalorization
- Waste recycling

..... **Contaminated soil remediation and restoration**

- Sampling, analysis, removal, treatment and/or contaminated site restoration

..... **On-site Services at client's site**

- Handling, conditioning and waste management
- Hazardous waste container management
- Cleaning of contaminated yards, containers, industrial pools and ponds

..... **Management of non-standard products**

- Destruction and disposal of off-spec, outdated or spoiled products (brand protection)

..... **Waste export and incineration**

- Persistent Organic Pollutants (POPs) management, treatment and disposal: Polychlorinated Biphenyls (PCBs), pesticides and halogenated wastes, among others.

..... **Waste assessment, analysis and characterization**

- Environmental waste consulting
- Waste analysis and characterization
- Hazard determination
- Analysis of heavy metals in industrial liquid and solid wastes
- Determination of PCBs
- Analysis of organic compounds

..... **Storage of hazardous products and waste**

- Temporary waste storage facilities according to DS.148 authorized by the Health Service
 - Flammable waste
 - Non-flammable waste
 - PCBs and POPs
